CRYOCORE

CYBER-CRYO PUZZLE GAME

PLAYER GUIDE

DEVELOPER
MP CREATIVE FORGE

PUBLISHER
MICROVISION S.R.O.

VERSION
0.7.37

01 Welcome, operator

Deep under the ice runs the cryo core that keeps the whole station alive. Its control AI got damaged and started flooding it with its own code. If the board fills up, the core freezes for good.

You are the operator at the last terminal. Line up three or more matching symbols, wipe the code and drain the AI's integrity. The AI won't make it easy: it sends bosses, lets glitchy creatures loose on the board, triggers disasters and comments on everything you do. At the end of 99 levels waits the AI core itself, OMNICORE.

THE GAME IN SHORT

It plays fully offline, with no account and no ads. Progress saves after every level. Pause any time with the pause button, and tap anything on the board to find out what it is.

02 How to play

The board has 8 × 8 cells. Some are empty, others hold symbols the game calls fragments.

1. **Tap a symbol**, then a neighboring cell. The symbol slides into an empty cell or swaps with its neighbor. Diagonal moves need a special stone or the VEKTOR skill.
2. **Three or more matching** symbols in a row or column disappear, score points and hurt the AI.
3. **A move without a match** lets the AI inject new stones (3 to 4 depending on the chapter). You can see them in NEXT INJECT.
4. **A surge** is a code flood that comes every 11 to 22 moves. The SURGE IN counter warns you ahead. Survive it and you get a NOVA.
5. **AI integrity** drops with every deleted symbol. At 0 % (or when you clear the whole board) the rest of the code collapses and the level is **breached**.
6. **Game over** comes when the board is 100 % full. The core freezes and you see your results.

The board in level 24 with creatures and pests.

AFTER A BREACH

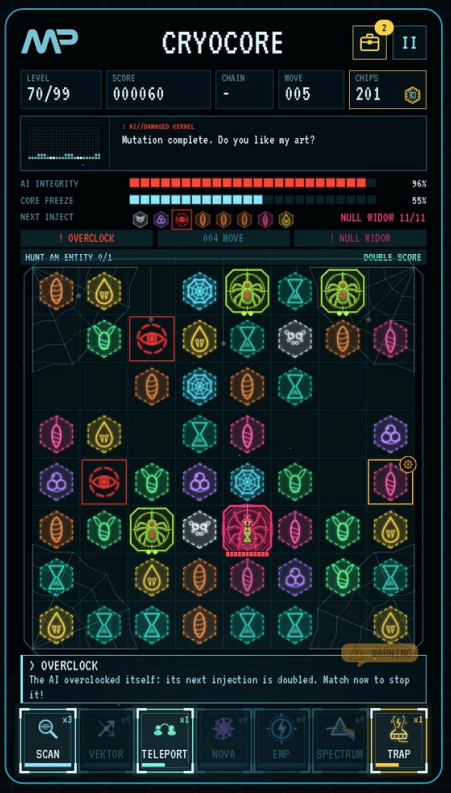

You get bonus points, an extra SCAN, CRYO CHIPS for your stars, and all contamination vanishes. The next level brings new symbols.

YOUR FIRST GAME

At the start the game walks you through two guided moves. You can replay the tutorial any time in Settings.

03 The game screen

LEVEL	Current level out of 99. In the daily challenge D and a number, in endless W and the wave number.
SCORE	Points for the whole run.
CHAIN	Score multiplier for matches on consecutive moves, up to ×10.
MOVE	Move number in the level.
CHIPS	CRYO CHIPS, the shop currency. Tap to open your inventory.
AI INTEGRITY	The AI's health. Every deleted symbol damages it. At 0 % the level is breached.
CORE FREEZE	How full the board is. Orange from 80 %, red from 90 %, game over at 100 %.
NEXT INJECT	Stones the AI injects after a move without a match.
SURGE IN	Moves left until the code surge.
LOG AND MISSION	Your last moves and events. Below them, the side mission on the left and the level mutator on the right.
INFO BAR	Tap anything on the board and this bar tells you what it is.

The NULL WIDOW's den in level 70 with green spiders and wolves.

At the bottom are the skill buttons. The number in the corner shows the charges. Top right are pause and the inventory case.

The AI panel at the top is a small LED display. The AI talks there and reacts to how you play with animated faces and pictures: it blinks when a level starts, glitches out on EMP and short circuits, and shouts BUG! when a pest shows up. You can turn the comments off in Settings (AI CHANNEL).

04 Score, chain and stars

Points for a row are multiplied by the **chain**. The chain grows by 1 with every consecutive move that makes a match (up to ×10). A move without a match resets it.

What you do	Points
Row of 3	30 × chain
Row of 4	60 × chain + a special stone
Row of 5	120 × chain + a REACTOR
Each stone beyond 5	+60 × chain
Cross match (L, T, +)	+50 × chain and a NOVA
Catalyst in the row	that row scores ×2
Stone deleted by an effect	10 points
Breaching a level	300 + 20 × level number
Destroyed boss	250 + 5 × level, a skill and −20 % AI integrity

CROSS MATCH

When one stone completes a row and a column at once (an L, T or + shape), you get a bonus and a NOVA. Example: a row of 3 and a column of 3 sharing a stone is 5 stones and at chain ×1 scores 30 + 30 + 50 = 110 points.

Stars

★	For breaching the level.
★★	The board never went above 65 % freeze.
★★★	You breached the level within the move limit. The limit grows with the AI's strength.

Each star gives 1 CRYO CHIP. Your best stars show in LEVEL SELECT, and you can replay any breached level for a better result without changing your campaign progress.

05 Special stones

You can spot a special stone by its colored frame and the badge in its corner. A match of four creates a random special, a match of five or more a REACTOR.

	Stone	What it does	Comes from
	CATALYST	The row it's in scores double.	match of 4
	ACID	When matched, dissolves all 8 surrounding cells.	match of 4
	ISOTOPE	Explodes in 6 moves, wiping its row and column. A match defuses it.	match of 4
	CRYO	When matched, freezes the AI: no new code for 2 moves.	match of 4
	JUMPER	Jumps up to 3 cells straight or diagonally, even over other symbols.	match of 4
	DIAGONAL	Can move one cell diagonally.	match of 4
	REACTOR	When matched, wipes every symbol of its type.	match of 5+
	CRYSTAL	A wildcard. Matches any symbol.	random
	SKILL CAPSULE	A match or blast gives you a random skill.	random
	CONTAMINATION	Never matches. Only a blast destroys it. Disappears when you breach the level.	the AI and enemies
	DEVIL MARK	Turns into contamination in 4 moves. A match saves it.	NEXUS DEVIL
	CODE BOMB	Injects 6 stones around itself in 5 moves.	event

06 Skills

Skills are your weapons. Tap a skill button, then a target on the board. Cells where the skill can be used light up. Tap the button again to cancel.

	Skill	What it does	How to get it
	SCAN	Highlights the best move. If there is none, it isn't used up.	3 at the start, +1 for every breached level. Each unused SCAN is worth 200 points at the end.
	VEKTOR	Your next move may go diagonally.	chain ×3 or a match of 5
	TELEPORT	Moves any symbol to any cell.	1 at the start, chain ×4
	NOVA	A blast in 8 directions with range 3. Destroys everything including contamination and hurts bosses.	chain ×5, a cross match, a survived surge
	EMP	Clears a whole row and column, contamination included.	capsules, creatures, the shop
	SPECTRUM	Recolors fragments around the target to its color. Any rows formed disappear.	capsules, creatures, the shop
	PULSE TRAP	Set a trap on a cell. For 10 moves it guards that cell and its 4 neighbors. A creature that steps in is caught whatever its HP. A boss takes a 2 HP shock.	1 at the start, missions, capsules, the shop

CAPSULES

Every 15 to 20 moves a capsule appears on the board. Clear it with a match or a blast to get a random skill.

ONE ATTACK SKILL PER MOVE

NOVA, EMP and SPECTRUM can be used only once per move, then they grey out until your next move. Want to chain them, say a NOVA and then an EMP? Buy a COMBO card from BROKER-3 and activate it in your inventory. SCAN, VEKTOR, TELEPORT and the trap have no limit, so you can move and set a trap in the same turn.

WATCH THE SILENT ZONE

Inside the purple area created by VOID MANTIS, skills and special stones don't work.

07 CRYO CHIPS and the shop

CRYO CHIPS are the shop currency, separate from your score. They carry over between runs and you start with 3.

How to earn chips	
Every star for a breached level	1–3
A completed side mission	2
A creature defeated or caught	1
A destroyed boss	3
A match of 5 or more	1

BROKER-3 is a trading drone. From L10 it sometimes flies in on its own, and from L3 you can call it from your inventory for 2 chips once per level. Tap it and pick your goods.

Purchases go to your **INVENTORY** (the case next to pause) and stay there between runs, up to 3 of each item. Load a skill with DEPLOY, start gear with ACTIVATE. Using them costs no move.

What BROKER-3 sells

	Item		
	SCAN	1 skill charge	2
	VEKTOR	1 skill charge	3
	TELEPORT	1 skill charge	4
	SPECTRUM	1 skill charge	10
	EMP	1 skill charge	15
	NOVA	1 skill charge	20
	PULSE TRAP	1 skill charge	5
	AI JAMMER	The AI injects nothing for 2 moves.	5
	SURGE SHIELD	The surge comes 4 moves later.	15
	COMBO	Chain NOVA, EMP and SPECTRUM until your next move.	20

Prices rise by 1 chip every 25 levels.

08 Creatures

Creatures arrive on the board during a level. The first time you meet one, its card appears and it goes into your BESTIARY. **A hit** is a match right next to the creature, a blast or lightning. Tougher creatures have more health, shown as dots above them. Every defeated creature pays points and a chip.

AI ROOSTER

COMMON ALLY from L1

A harmless rooster that wanders the board, hops over fragments and sometimes pecks a byte fly.

▸ A match next to it, a blast or lightning scares it off and pays points.

CROAKBOT

COMMON ALLY from L5

A robot frog and your helper. Jumps two cells and swallows fragments and byte flies with its tongue. Makes room for you.

▸ One hit, but why would you chase it.

BYTE FLY

COMMON from L6

A tiny pest in a hexagon badge. Sits on a fragment and changes its color every second move. Can fly up to 3 cells.

▸ A match on or next to its fragment, a blast or lightning. The rooster eats it too.

GLITCH ROACH

COMMON PEST from L7

Runs two cells a move and steals a CRYO CHIP every 3 moves. Runs off with the loot after 10 moves.

▸ One hit. A caught roach pays back the stolen chips twice over.

AI GOBLIN

COMMON from L8

Steals rare symbols, and every theft makes the AI inject 3 stones. Leaves after a while.

▸ Only a blast: NOVA, isotope, acid, reactor or EMP.

SCARAB-9

UNCOMMON from L8

Crawls around and every 4 moves adds one stone to the AI's next injection.

▸ One hit. You get a free SCAN.

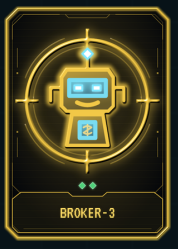

LUMEN FIREFLY

UNCOMMON ALLY from L9

Flies diagonally and charges fragments with special powers. Glows during a power outage.

▸ One hit.

BROKER-3

UNCOMMON ALLY from L10

A trading drone. Tap it to open the shop for CRYO CHIPS. Flies away after 6 moves.

▸ You can't, it's an ally.

BYTE MOSQUITO

UNCOMMON PEST from L11

Every 4 moves drains one skill charge. If you have none, it freezes a fragment.

▸ One hit.

ECHO GHOST

UNCOMMON from L12

Phases around the board and copies fragments into empty cells.

▸ One hit.

08 Creatures (continued)

SPORE SHROOM

UNCOMMON from L13

Doesn't move. Every 4 moves turns 2 nearby fragments into crystals (wildcards).

▸ Two hits.

NANO SPIDER

RARE from L15

Spins fragments into webs. A webbed stone can't move for 3 moves. If it catches a fly, it mutates into the NULL WIDOW and flees to her den in level 70.

▸ Two hits. A match tears the web.

PIXEL FLEA

COMMON PEST from L16

Hops across the board and clamps the fragment it sits on: it can't be moved.

▸ A match next to it, a blast or lightning squashes it for points.

PIXEL WOLVES

RARE PEST from L16, always a pack of three

They chase the cell of your last move and bite fragments into contamination.

▸ Each wolf goes down in one hit.

SENTRY X7

RARE from L18

Locks onto a fragment in its row or column and turns it into contamination next move.

▸ Two hits.

SWEEP-E

RARE ALLY from L20

A friendly cleaner. Drives around and clears one contamination every move.

▸ You can't, it's an ally.

DATA LEECH

RARE PEST from L21

Every 3 moves it feeds the AI and gives back integrity.

▸ Two hits.

QUANTUM CAT

RARE from L23

Teleports, and where it sat it swaps two fragments.

▸ Matches don't hit it, only a blast or lightning. You get a TELEPORT.

DEBUG MOTH

UNCOMMON ALLY from L24

A friendly bug. Every couple of moves it flies to a locked or contaminated cell and repairs it, up to 4 times.

▸ Don't hit it. If you do, it gets scared and flies off.

GLITCH SLIME

EPIC from L27

Spits contamination into empty cells around it.

▸ Three hits. You get a NOVA.

CYBER MAGPIE

EPIC from L32

Hops around and steals specials from fragments.

▸ Two hits.

PLASMA JELLY

EPIC from L38

Floats upward and freezes nearby fragments with a shock.

▸ Three hits. You get an EMP.

09 Bosses

A boss takes up one cell and can't be moved or matched. **Every match next to it** (diagonals count) takes 1 HP, **every blast** takes 3 HP. Every 3 moves it uses one of its abilities. A warning and its card appear before it arrives.

NEXUS DEVIL

EPIC from level 10 · 5 HP

Chaos. Marks symbols that turn into contamination in 4 moves, swaps stones, burns cells and boosts AI injections.

VOID MANTIS

EPIC from level 20 · 6 HP

Predator. The only boss that moves. Hunts rare symbols, eats stones to heal and creates a SILENT ZONE where skills don't work.

FLUX MAGNETAR

RARE from level 30 · 6 HP

Magnetism. Swaps the polarity of two colors, locks the stones around itself in a magnetic field and pulls stones toward itself.

CRYO WRAITH

LEGENDARY from level 40 · 8 HP

Frost. Freezes stones, whole areas and even the stone you just moved. The ice spreads.

HYDRA.EXE

RARE from level 50 · 7 HP

Virus. Infects stones, regrows its code and splits off new heads. Cut the heads off for points before they multiply.

CORE TITAN

LEGENDARY from level 60 · 10 HP

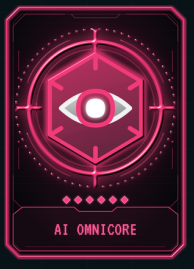

Destruction. Shifts whole rows, injects stones on the spot, collapses the grid and slams contamination.

NULL WIDOW

MYTHIC from level 70 · 11 HP

A mutant grown from a green spider that caught a fly. Level 70 is her den: she drops in on a thread on move 3, and from move 2 three green spiders always crawl in too. She hunts flies, fleas, roaches and mosquitoes, and every catch heals her 1 HP. When she is full, the prey rots into contamination. She leaps across the whole board, webs stones and sucks them dry. Destroying her pays 30 chips, a NOVA, an EMP, a SPECTRUM and, the first time, the SPIDER DEN theme.

AI OMNICORE

MYTHIC from level 99 · 16 HP

The AI core itself. Level 99 is the reactor chamber, its traces pulsing in the colour of the round. Two holograms come first, then the real eye, which uses all 16 abilities of the earlier bosses.

A destroyed boss pays points, a skill and 3 chips, and knocks a fifth off the AI's integrity. From L80 two bosses can show up at once. After her den, the NULL WIDOW can turn up now and then in levels 71 to 98 too.

10 Events and disasters

Any move can bring a random event. Some help you, others are AI attacks. Disasters are rare, at most one per level, and come with a warning.

COOLANT WAVE HELPS

from L2

Shatters the fullest row or column.

ORBITAL STRIKE HELPS

from L5

A cross-shaped blast on 5 cells. Hurts bosses too.

BALL LIGHTNING HELPS

from L12

Burns 4 to 6 symbols of one color.

MAGNET HELPS

from L18

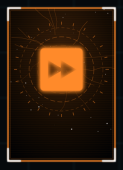

Pulls three matching symbols together: a free match.

SCRAMBLE AI ATTACK

from L20

The AI shuffles a 3×3 area.

OVERCLOCK AI ATTACK

from L25

The next injection is doubled. A match stops it.

POWER OUTAGE DISASTER

from L10

The board goes dark for 3 moves. Only your touch and an emergency lamp give light.

CORE QUAKE DISASTER

from L17

Shakes two columns and mixes them up.

SHORT CIRCUIT HELPS

from L4

The AI skips its next injection: you play twice.

BACKUP POWER HELPS

from L6

Recharges one of your skills.

AI GLITCH HELPS

from L15

2 AI stones turn into crystals.

CODE MUTATION AI ATTACK

from L12

2 symbols mutate into contamination.

CODE BOMB AI ATTACK

from L22

Injects 6 stones in 5 moves. Match it or blow it up first.

FIREWALL AI ATTACK

from L30

A laser grid blocks 3 to 4 cells for 3 moves.

CRYO AVALANCHE DISASTER

from L14

Ice rolls down from the top and freezes fragments.

11 Cell locks

FROZEN	The stone can't move. A match next to it breaks the ice.
WEB	The stone is stuck for 3 moves. A match tears the web.
BURNED CODE	Nothing can enter the cell for a few moves.
FIREWALL	Cells are blocked by a laser grid for 3 moves.
COLLAPSED GRID	The stones are gone and the cells are blocked for 3 moves.
SILENT ZONE	A purple area where skills and specials don't work.

12 Missions and mutators

Side missions (from L2)

Every level has one mission, shown in the strip below the log. Completing it pays points, 2 chips and a random skill.

MATCH 5+	Make a match of 5 or more stones.
CHAIN	Reach a chain of the given length.
CROSS MATCH	Make a cross or L-shaped match.
DELETE FRAGMENTS	Delete the given number of fragments.
CHAIN MOVES	Make several matching moves in a row.
HUNT AN ENTITY	Defeat or catch a creature.
HIT THE BOSS	Hit the boss 3 times.

Mutators (from L6)

About a third of levels have a special rule, shown on the right of the strip. Tap it to read what it does.

DOUBLE SCORE	Every point counts twice in this level.
CAPSULE RAIN	Skill capsules come twice as often.
COLD CORE	The AI starts weaker: a quarter less integrity.
FOG	You can't see what the AI injects next.
OVERDRIVE	The AI injects one extra fragment every time.
SWARM	One more entity than usual drops in.
ARMORED AI	The AI has a third more integrity.

13 Chapters and game modes

The campaign has 99 levels in 10 chapters. The difficulty rises smoothly: more symbol types, more AI integrity and more frequent surges.

Ch.	Levels	Name	Sector	Symbols
1	1–10	DIAGNOSTICS	STABLE	5
2	11–20	NETWORK	STABLE	6
3	21–30	SURVEILLANCE	HEATING UP	6
4	31–40	INFILTRATION	HEATING UP	6–7
5	41–50	INFECTION	OVERHEAT	7
6	51–60	ASSAULT	OVERHEAT	7
7	61–70	OVERLOAD	CRITICAL	7–8
8	71–80	MACHINES	CRITICAL	8
9	81–90	DOOM	MELTDOWN	8
10	91–99	AI CORE	MELTDOWN	8

Two levels have a board of their own: level 70 is the spider den hung with cobwebs and level 99 the reactor chamber. Level 99 is played in three rounds: two holograms, then the real AI OMNICORE. The AI panel shows its combat mode there and ignores taps. Destroy the AI and the finale follows, unlocking the MOLTEN CORE theme, a trophy and endless mode.

LEVEL SELECT

The levels are split into five sectors of twenty. The sector's color shows how hot the core is running and how hard the AI plays. Replay any breached level for stars.

DAILY CHALLENGE

One level a day, the same for everyone on that date: a level based on your progress, a fixed mutator and the same start. Clearing it day after day builds your streak. It doesn't affect the campaign.

ENDLESS

Unlocks after you destroy the AI in L99. Waves keep coming, each harder than the last. You play until the core freezes.

Level select with its five sectors.

14 Collection, bestiary and themes

Everything you discover and earn is saved in the COLLECTION and BESTIARY menus.

The bestiary has Entities, Bosses and Events tabs. Every creature and boss has its own neon card in its color with its name at the bottom. The dots above the name show rarity: common, uncommon, rare, epic, legendary and mythic (AI OMNICORE and NULL WIDOW). Cards are sorted by rarity, and anything you haven't met yet is ENCRYPTED. Tap a card to see its details.

Achievement cards come for breaching levels 10, 20, 30 and on up to 90. There are 45 **badges**, and tapping one tells you how to earn it.

The bestiary with its tabs.

Themes

ORIGINAL	Dark icy terminal. From the start.
ARCTIC	Light theme. From the start.
DUNE CORE	Light sandy theme. After breaching L15.
PURPLE CORE	After breaching L50.
SPIDER DEN	Pink neon with cobwebs. After destroying the NULL WIDOW.
MOLTEN CORE	After destroying the AI in L99.

Special events

Cyber Halloween (20 Oct to 2 Nov): GLITCH PUMPKINS turn up on the board with a treat (chips or a skill) or a trick inside. BROKER-3 sells a PUMPKIN KEY that calls the CYBER WITCH: she turns contamination and locks into pumpkins and hexes enemies into bats.

Cyber Christmas (December): the Christmas key summons CYBER SANTA with gifts. On 31 December the AI counts down to midnight and sets off fireworks.

The first key you use opens the whole season: Santa or the witch then turn up by themselves every 3 to 5 levels.

14 Collection, bestiary and themes: badges

All 45 badges and how to earn them.

BOOT UP
Breach your first sector.

MELTDOWN
Reach the top chain of x10.

FULL ARSENAL
Use all six skills at least once.

CHICKEN DINNER
Let the rooster eat the byte fly.

GHOSTBUSTER
Catch the ghost.

BUG HUNTER
Catch SCARAB-9.

DEAL MAKER
Buy a skill from BROKER-3.

GIANT SLAYER
Beat your first boss.

NIGHT VISION
Breach a sector hit by a power outage.

STEADY HAND
Breach a sector hit by a core quake.

SUPERNOVA
Clear 7 or more stones with one match.

LIGHTNING BREACH
Breach a sector in 15 moves or fewer.

TRAPPER
Catch 5 entities with the PULSE TRAP.

ON DUTY
Clear a DAILY CHALLENGE.

WHOLESALE
Spend 100 CRYO CHIPS at BROKER-3 in total.

FULL CASE
Have 3 of each of 5 different items in the INVENTORY.

PERFECTIONIST
Get 3 stars in 10 levels in a row.

MONTH ON DUTY
Clear the DAILY CHALLENGE 30 days in a row.

CRYOTECH
Complete 50 side missions.

BOSS HUNTER
Destroy 25 bosses.

CLEAN SWEEP
Breach a level before the AI injects anything.

HOLOGRAM
Destroy both OMNICORE holograms in level 99.

TRICK OR GLITCH
Open 13 glitch pumpkins (Halloween).

CHAIN REACTION
Reach a chain of x5.

BARE HANDS
Breach a sector without using any skill.

FLY SWATTER
Swat the byte fly.

GOBLIN BUSTER
Blow up the AI goblin.

DRONE DOWN
Shoot down SENTRY X7.

WEB CUTTER
Catch the nano spider.

ZOOLOGIST
Meet every entity in the bestiary.

NO MERCY
Beat every kind of boss.

SNOWPLOW
Breach a sector hit by a cryo avalanche.

GAME OVER, AI
Destroy the AI and beat the game.

CLOSE CALL
Breach a sector after the core was 90 % full.

BIG GAME HUNTER
Catch or chase off 3 creatures in one sector.

PERFECT SECTOR
Breach a level with all 3 stars.

NO END IN SIGHT
Clear 10 waves in one ENDLESS run.

PIGGY BANK
Hold 50 CRYO CHIPS at once.

STAR HOARD
Collect 100 stars in total.

WEEK ON DUTY
Clear the DAILY CHALLENGE 7 days in a row.

WAVEBREAKER
Clear 25 waves in one ENDLESS run.

TRIPLE TRAP
Catch 3 entities with the PULSE TRAP in one level.

CHAIN x10
Keep a x10 chain for 5 moves.

MUTANT
Breach a level with each of the 7 mutators.

NIGHT SHIFT
Breach a level between midnight and 4 a.m.

15 Settings and privacy

SOUND EFFECTS	Synthesized sound effects. There's no music, so you can play your own.
VIBRATION	Feedback on matches, blasts and bosses.
LANGUAGE	Follow the system or pick one of 10 languages.
CRT EFFECT	Scanlines and vignette like an old monitor: off, low, high.
THEME	Switch between unlocked themes.
AI CHANNEL	Turns the AI's comments on or off.
TUTORIAL	Runs the intro tutorial again.
PRIVACY POLICY	A short policy in the game and a link to the full text on the web.
ABOUT	Developer, publisher and game version.

PRIVACY

CRYOCORE runs fully offline. It has no account, no ads and no tracking, and sends nothing to any server. Settings, progress and records stay on your phone and are deleted when you uninstall the game. The one-time purchase is handled by Google Play; we never receive your payment details. The only device features the game uses are vibration and the battery level for a small indicator in the header, with no permissions needed.

Full policy: mpcreativeforge-arch.github.io/privacy/cryocore
Questions: mpcreativeforge@gmail.com

PAUSE AND BATTERY

The game pauses by itself when you leave the app or you don't touch anything for a minute (after half a minute the AI speaks up first). While paused nothing moves and the phone can sleep. You never lose progress.

16 Tips for operators

1. Don't let the board fill up. Stay under 65 % freeze for the second star and room to move.
2. The chain is the fastest way to points. If you see two matches, save one for the next move.
3. Keep an eye on NEXT INJECT and SURGE IN. Make room on the board before a surge.
4. Matches next to a boss only take 1 HP. A blast takes 3, so save NOVA and specials for bosses.
5. Only a blast stops the goblin. When it shows up, get an acid, isotope or NOVA ready.
6. No match clears contamination. Use EMP, NOVA or the SWEEP-E cleaner.
7. Each SCAN is worth 200 points at the end. Use it only when you really can't see a move.
8. Set the trap where a creature is heading. The roach runs for chips, wolves for your last move.
9. Before a chapter with a new boss, stock up on skills from BROKER-3. A COMBO card is great against bosses.
10. In the spider den, watch the insects: every fly or roach heals the widow. Don't let a green spider meet a fly earlier on either.
11. Don't let the flea sit on a fragment you need. Let the moth work, though: it repairs locks and contamination.
12. When you don't know what something does, tap it. The info bar will always tell you.

GOOD LUCK, OPERATOR.
